

LODAX Trench Bridge

« 1 year *GUARANTEE* »

Guarantee coverage

LODAX will provide a limited 1 year replacement warranty to the original (retail). This warranty is limited to the replacement of the original Trench Bridges. The warranty covers exceptional defects which may occur during the manufacturing process. These defects will become visible/problematic during normal use of the LODAX Trench Bridges. It is important to understand the intended use and function of the product in order to determine whether there was a manufacturing defect or if the mat just wasn't used for its intended purpose (please see '**intended use of LODAX Trench Bridges**' below).

LODAX Trench Bridges are guaranteed against breaking and as a result it becomes unusable (the following parts are not included in the warranty: drilling holes, corners, connection points/handles)

The bridges can still be used if some parts of the connection points are broken or if the fixation points/corners are broken (if the bridges are used following our recommendations).

These bridges are subjected to strict testing/inspection during the manufacturing process. Each bridge that leaves our manufacturing plant has passed the testing and has been found acceptable for LODAX.

Although occasional, there are small defaults that are not detected during our visual inspection, these are the situations that our guarantee covers.

The warranty covers following measurements:

- 1700x1000x80mm

Natural wear and tear isn't covered by our guarantee. Signs of normal wear and tear should be expected but this doesn't mean that the product is defect/broken. Possible manufacturing flaws will be detectable/visible in the first months of usage. Every case of a defect/broken product will be individually inspected and examined. It is recommended to connect different bridges together (increase stability). Holes are provided to install handrails. The connection will help stabilize the bridges during usage by pedestrians or light vehicles.

Products defect by improper installation are not under warranty.

Always consult our user manual before using LODAX's products.

Our warranties are limited to the value of the product and the replacement of the bridges. Our warranty does not cover any consequential damages from an accident or the like.

LODAX Trench Bridges used in a rental fleet are not eligible for warranty replacement.

The intended use of LODAX Trench Bridges?

LODAX Trench Bridges are used as a bridge to cross trenches.

- Maximum dimension of the trench is 1000mm wide
- Maximum load is 1000kg per Bridge
- Ground has to be flat and levelled both sides of the bridge
- Bridges have to be fixed to the ground
- Bridges should not be thrown on the ground
- Do not park or stand still on the bridge with a vehicle.
- Max. Speed limit to cross the bridge: 5 km/h.

Disregarding this warning is irresponsible and could cause damage to the vehicle or injure nearby co-workers. The key for proper usage solely relies on the responsibility of the end-user.

Using chains or cables/ropes to extract stuck bridges from the mud is not only dangerous, but will also damage the bridges. Damage caused by these actions aren't included in our guarantee. The warranty doesn't include damage caused by steel tracks (without rubber around them). LODAX Trench Bridges are only meant for vehicles with rubber tires (no steel tracks...) and for pedestrians.

The maximum compression applied from the tire on to the bridge is limited to 5 N/mm² (on solid/hard soil).

NOTE : A hard soil has a bearing load capacity of 30dan/cm².

More information on request.

A temporary deformation of the Trench Bridges is always possible (Plastic material has excellent load spreading capabilities due to its flexibility).

How to obtain a replacement of a Trench Bridge?

If it may ever occur that one of your bridges is defect/broken, you can always contact the dealer where you originally purchased the bridges. The dealer will look at your case and will make sure the mat reaches us for further inspection.

In every case, LODAX will choose if they need to receive the broken bridge in order to be able to replace it.

Shipping costs will always be billed at the expenses of the client.

LODAX will not accept bridges back without our authorization.

Pictures or video to prove the problem on site will be also be needed.

If you should have bought the products directly from LODAX, please contact LODAX straight away. You will also need to provide us the invoice which involves the broken mat.

Time Limit for a replacement request?

A warranty request for LODAX Trench Bridges should be asked within 12 months following to the invoice.

Remark: Understanding what the mats are intended for , using them properly, and providing some form of simple maintenance will not only add life to your bridges, but also ensure the maximum performance you deserve from LODAX Trench Bridges.
